*CLOUD COMPUTING*

Apache CloudStack Collaboration Conference Europe
Amsterdam 20 / 21 / 22 November 2013

## 3 years partnership anniversary between CloudStack and Apalia

Amsterdam, November 20 2013 – **APALIA, an advisory and engineering firm, specialized in Private, Hybrid, and Public Cloud infrastructure is proud to announce its 3 years partnership anniversary with CloudStack at the Apache CloudStack Collaboration Conference Europe.**

Pierre Vacherand, founder and CTO of Apalia, hosts two workshops on November 21 and 22. He will provide with practical insights based on 3 years hands-on experience with CloudStack. The first workshop focuses on the challenges to implementing CloudStack in various production environments, and the second highlights how powering up CloudStack with Amysta™, a software solution for Cloud Computing cost control and usage visibility.

Apalia, one of the European Cloud Computing pioneers, assists customers all around the world to design, build and operate Private, Hybrid and Public Cloud infrastructures in the perspective of "IT as a Service". Since 2010 Apalia helps Enterprises and Service Providers to modernizing their IT infrastructure, increasing their agility thus benefits, and optimizing their expenditures.

Apalia solution and service offerings cover the virtualized and secured Cloud infrastructures (IaaS), as well as mobility (EMM) and desktops (VDI) including the System, Networking, Storage, Desktop, Orchestration, and Governance subsets.

**About APALIA**
Cloud computing brings innovative approach and technologies to modernize the Information Systems' Infrastructure. Since its inception in 2010, APALIA uses virtualization and Cloud Computing to enable customers to implement the "IT as a Service" model. The proven innovative technologies and operational processes recommended by APALIA enable greater agility, enhanced security, increased productivity, and reduced costs for the benefit of the Organizations' IT departments, and ultimately the end-users experience and business efficiency.
